

The Wellfirst Enduro RLP is a premium liner top seal that is designed for use in a wide variety of applications. The seal utilizes a proprietary blend of elastomer that is ideal for operation in primary conditions with high pressures and temperatures — up to 7,500 psi (51.7 MPa) and 400° F (204°C). When used in conjunction with the Enduro Running Tool and other liner circulation tools, the robust design is ideal for drilling in and circulating liners into position. A large beveled liner entry facilitates liner re-entry for workover or tractor operations.

Features

- Large bore liner top seal is suitable for drill-down operations
- Available in standard, thermal, and sour gas configurations
- Rated to 7,500 psi (51.7 MPa) and 400°F (204°C) primary and 2,500 psi (17.2 MPa) and 675°F (357°C) thermal

Thermo Seal Packing Element

For higher temperature static and dynamic applications — up to 675°F (357°C) and 2,500 psi (17.2 MPa) — the Thermal Sole Liner Top Seal Packer can be configured with our proprietary Thermoator Seal Packing Element. The chemically inert thermo seal material was tested to 675°F (357°C) and 2,500 psi (17.2 MPa). A unique internal mechanical locking mechanism charges the seal and maintains complete set force for the life of the installation.
